Subject: RE: IO briefing on Invora registration application for pastureland
Attachments: OPP General Notes 7-1-19_DRD.docx

Hi Dan,

Just checking in again on the timing for when you'll be ready to brief the OCSPP IO on the Invora registration. This was mentioned during the OPP General last week (see attached and below) and Rick mentioned briefing her around the end of the month. When you are ready to request the briefing, feel free to fill in the chart below and we'll submit the request. Thanks.

- **Texas Field Tour** - Last week Alex participated in the Texas field tour and met with the National Cotton Council, Texas Commission on Environmental Quality and the Agriculture Commissioner. She also met with cattlemen in favor of using Invora on rangeland and pastures (this group also met with Texas Congressman, Mike Conaway on the issue). Bayer submitted an application for the proposed new use of Invora on rangeland and pastures. The product contains aminocyclopyrachlor and triclopyr. The due date for a regulatory decision is September 3, 2019. Currently, Oregon and Washington State are developing state proposals to ban use of products with this chemical due to extensive damage to old growth pine trees along roadways. Bayer and the cattlemen plan to provide data and a sustainability plan to support use of Invora on rangelands and pastures and would like to schedule a 2-day workshop at EPA PYS. Alex is amenable to EPA meeting with the group. Rick said the team can brief Alex on the Invora risk assessment around the end of July.

Thanks Darlene.

This one is in Dan Kenny's branch and he's not here today. N **Ex. 5 Deliberative Process (DP)**
